AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1 & 2. (Cancelled).

3. (Currently amended) The device of Claim 24, wherein the cannula is arranged to deliver the fluid into the anterior chamber of the eye, and the orifice is located a predetermined distance from the distal tip.

4. (Currently amended) ~~The device of Claim 2~~ A spray device arranged to deliver a fluid into an eye, comprising a reservoir arranged to house the fluid to be delivered, a cannula having a distal tip for insertion into the eye, said cannula in fluid communication with said reservoir and having an orifice located inward of said distal tip, said orifice including a sleeve surrounding and extending from said orifice in a direction desired for the fluid delivery and a pressurizer arranged to move the fluid from said reservoir through said orifice to an intra-ocular structure within the eye, wherein the cannula is constructed so as to allow for the control of the direction of the fluid delivery.

5. (Original) The device of Claim 4, wherein said sleeve is flared outward from said orifice.

Application No. 10/073,737
Amendment Dated March 19, 2004
Reply to Final Office Action of November 21, 2003

6. (Currently amended) ~~The device of Claim 2~~ A spray device arranged to deliver a fluid into an eye, comprising a reservoir arranged to house the fluid to be delivered, a cannula having a distal tip for insertion into the eye, said cannula in fluid communication with said reservoir and having an orifice located inward of said distal tip, said cannula having a distal portion extending from a location inward of said orifice to said distal tip, said device further comprising a fin extending longitudinally around said distal portion and a pressurizer arranged to move the fluid from said reservoir through said orifice to an intra-ocular structure within the eye, wherein the cannula is constructed so as to allow for the control of the direction of the fluid delivery.

7. (Currently Amended) The device of Claim ~~1~~4, said cannula arranged for facilitating controlled dispersion of the fluid.

8. (Currently Amended) The device of Claim ~~1~~4, said pressurizer including a plunger inserted into said reservoir and arranged to deliver a specified aliquot of the fluid to the anterior chamber.

9. (Currently Amended) The device of Claim ~~1~~4, wherein the fluid is a dye or stain in liquid, aqueous, or gel form.

Application No. 10/073,737
Amendment Dated March 19, 2004
Reply to Final Office Action of November 21, 2003

10. (Currently Amended) The device of Claim ~~14~~, wherein said orifice is arranged to deliver the fluid towards the anterior lens capsule.

11. (Currently Amended) The device of Claim ~~14~~, said reservoir including a cannula hub attached to said cannula.

12. (Original) The device of Claim 11, further comprising an elbow at a bend in said cannula between said cannula hub and said distal tip.

13. (Currently Amended) The device of Claim ~~14~~, wherein said orifice is structured to deliver the fluid in a spray form.

14. (Currently Amended) The device of Claim ~~14~~, further comprising the fluid contained in said reservoir that is delivered into the eye.

15. (Original) The device of Claim 14, wherein the fluid contained in said reservoir is indigo carmine.

Claims 16 & 17. (Cancelled).

Application No. 10/073,737
Amendment Dated March 19, 2004

18. (Currently amended) ~~The device of Claim 17;~~ A spray device arranged to deliver a fluid into a cavity, comprising a reservoir arranged to house the fluid to be delivered, a cannula having a distal tip for access into the cavity, said cannula in fluid communication with said reservoir and having an orifice located inward of said distal tip, said orifice including a sleeve surrounding and extending from said orifice in a direction desired for the fluid delivery, and a pressurizer arranged to move the fluid from said reservoir through said orifice to a tissue within the cavity.

19. (Original) The device of Claim 18, wherein said sleeve is flared outward from said orifice.

20. (Currently amended) ~~The device of Claim 17;~~ A spray device arranged to deliver a fluid into a cavity, comprising a reservoir arranged to house the fluid to be delivered, a cannula having a distal tip for access into the cavity, said cannula in fluid communication with said reservoir and having an orifice located inward of said distal tip, and a pressurizer arranged to move the fluid from said reservoir through said orifice to a tissue within the cavity, said cannula having a distal portion extending from a location inward of said orifice to said distal tip, said device further comprising a fin extending longitudinally around said distal portion.

21. (New) The device of Claim 4, wherein said distal tip is closed.

Application No. 10/073,737
Amendment Dated March 19, 2004
Reply to Final Office Action of November 21, 2003

22. (New) The device of Claim 6, wherein said distal tip is closed.
23. (New) The device of Claim 18, wherein said distal tip is closed.
24. (New) The device of claim 20, wherein said distal tip is closed.
